

RAPIDMIND

Every developer will use RapidMind. Use it or build it—It's your choice.

Picture yourself as part of the organization that is revolutionizing the way software is developed. RapidMind offers an inspiring environment where your contributions will fuel the next generation of software development.

RapidMind is used worldwide to develop high-performance solutions for the gaming and animation, finance and investment, oil and gas, scientific computation and enterprise markets.

RapidMind provides the highly respected software development platform that allows software vendors to deliver high performance on multi-core and stream processors, including the Cell BE, GPUs and CPUs.

Without sacrificing development simplicity, RapidMind-enabled applications experience a dramatic leap in performance.

Working at RapidMind

Our people work hard, inspire one another and contribute to making our customers successful. Everyone is armed with the latest technology and tools to make an efficient and valuable contribution.

RapidMind is the hub of innovation, where you can peruse our library of technical references, blue-sky on the whiteboards with colleagues, or unwind by playing a game of air hockey.

Benefits

RapidMind offers a total reward package:

- Healthy work-life balance
- Unique work experience
- Competitive pay
- Comprehensive health care benefits
- Paid vacation

RapidMind's comprehensive health care package includes medical and dental care, along with life, disability and travel insurance.

Free-range Fridays

Every Friday is set aside as a 'free' day for people to work on self-directed projects, using our platform. Free-range Fridays gives everyone the chance to work on projects of their choice, and empowers them to create new applications or add new features to the platform. It's a chance to learn from others, push the boundaries of our platform, or show off your skills in a supportive environment.

About RapidMind

Based in Waterloo (Canada), RapidMind is a venture-funded private company that is built on over five years of advanced research and development.

The RapidMind Development Platform was recently honored by the IEEE as their 2007 Software Winner, recognizing the best technology projects of the year.

With a combined population of over 500,000, Waterloo Region is one of the fastest growing areas in Ontario. The region is positioned close to major North American markets, air transportation, and offers excellent education, health care, cultural and recreational facilities.
